POSTDOCTORAL POSITION IN ORGANIC/ORGANOMETALLIC CHEMISTRY

A postdoctoral position will be available in spring 2022 (starting from April 1st 2022) in the “Catalysis and Application” team of the “Laboratoire de Chimie Moléculaire et Thiorganique” (<https://www.lcmt.ensicaen.fr/groupe-jean-luc-renaud>) of the Université de Caen Normandie for 12 months under the supervision of Prof. Jean-Luc Renaud. The project, funded by an industrial grant, will involve the development of new catalysts for chemoselective reduction and alkylation.

The ideal candidate for this position will be highly motivated, must hold a PhD in chemistry with a specialization in organic chemistry, broadly defined, and homogeneous catalysis. Applicants will further benefit from experience in organometallic chemistry.

Applications should include a CV and a research summary as well as arranging for two letters of recommendation to be sent directly to Prof. Jean-Luc Renaud (jean-luc.renaud@ensicaen.fr).
